New Orleans, June 29.—While the cotton market closed at a not gain for the day of 5 to 6 points, the tendency in the afternoon session was to sag, chiefly as the result of selling out on the long side, which was induced by a private bureau report on condition of 50 per cent. In the early trading the market had a firm undertone on good cables and dry and hot weather over the South. The weather forecast indicating no material change in weather conditions for the week was an important sustaining influence. At the highest trading months were 12 to 14 points over Saturday's close. Cotton futures closed: July, 13.21; August, 13.26; October, 12.63; December, 12.63; January, 12.72; March, 17.82.
